KHUSHI BANSAL

Product Manager · Deep tech, AI and data-driven products
Ajmer / Bengaluru, India · khushi.bansal0999@gmail.com · +91-78916 11159 · LinkedIn · Portfolio · GitHub

SUMMARY

Engineer moving into product management. Spent 3.9 years at Ola Electric owning battery-management features end to end across millions of EVs with no PM on the team: **₹3 Cr** of scrapped hardware recovered, false failure alerts cut **80%**, one patent co-filed. Top Fellow at Next Leap; now building AI products solo, problem definition through to shipped app.

EXPERIENCE

OLA ELECTRIC
Bengaluru, India

Software Development Engineer, Battery Management Systems & Fleet Analytics Jun 2022 – Apr 2026

Owned 3 production firmware modules end to end: specs, acceptance criteria, phased rollout. No PM on the team.

Pack health and warranty recovery. *Returned battery packs were being scrapped with no view of what was still good.*

- Built the fleet-wide pack-health view behind a 13S rebuild: **~70% of warranty returns salvaged, ₹3 Cr saved**

Fault detection. *Healthy vehicles were being flagged as faulty, so owners went to service centres for nothing.*

- Rewrote the fault specs after separating real failures from sensor noise: **false alerts down 80%**, pre-charge down 25%

Digital Charger. *Charger software sat across six teams with nobody owning the whole thing.*

- Owned it across 6 teams, hardware through to go-to-market: **₹1,500/unit** off the bill of materials

Fast charging. *"Reduce charge time" arrived as an ask with no definition of what was safe.*

- Built a rule that picks charging current against pack health rather than a fixed profile: **30% better time estimates**

Thermal safety. *Field data showed a heat risk nobody had flagged.*

- Shipped core-temperature prediction with gradual power easing, chosen over a hard cut-off

PM FELLOWSHIP

NEXT LEAP PM FELLOWSHIP
Jun 2026 – Present

PM Fellow, selected as Top Fellow

Tip of My Tongue · graduation project · why people cannot find their own old photos · Python, Gemini, Streamlit

- **52%** with large libraries fail to find a photo monthly; **82% of failures** start on a clue the app misread
- Built a discovery engine over **6,551 public posts** to reach 84 verified cases, plus a survey of 31 and 5 interviews
- Reproduced it in a controlled test: "last august" got pinned to one year and lost the photo, "august 2025" found it
- Shipped the clue-by-clue version that asks once when ambiguous: **RICE 162**, kill line at 0.4 questions/search
- Hand-audited 20 of the AI classifications and published the correction: the 82% becomes 76%
- **ChatGPT Voice adoption.** Researched why people try voice mode then stop, and scoped a prototype around it
- **Teardowns.** Duolingo's retention loop: proposed one consolidated reward tier, with a metric. Also smallcase, Swiggy

AI PRODUCT BUILDS (SOLO, 0→1)

Mutual Fund FAQ Assistant · grounded Q&A over scheme documents for 3 HDFC funds · React, Lovable, LLM API

- Facts only: every answer cites its source and refuses rather than guesses, because a wrong answer here is regulatory

CineVerse AI · personalised movie and book recommender · React, Lovable, TMDB API, Supabase

- Scoped to 5 screens and **6 explicit non-goals**, then took the catalog from 35 to **173 titles** via TMDB and Open Library

Ascend · gamified habit tracker, Solo Leveling theme · React, full-stack

- Cut everything from v1 except the XP and streak loop, to test the retention mechanic before building on top of it

PATENT

Adaptive Charge Scheduling for Electric Vehicle Batteries · Co-inventor with Arnav Raj · Ola Electric Mobility Ltd · App. No. 202441061894, filed Aug 2024, published Feb 2026

- Schedules each charge against that pack's own health and temperature history, not a profile fixed for every vehicle

EDUCATION & LEADERSHIP

NATIONAL INSTITUTE OF TECHNOLOGY (NIT), DURGAPUR
May 2022

B.Tech, Electrical Engineering

MCKINSEY FORWARD PROGRAM
Enrolled 2026

- **Webinar & Online Training Lead, IEEE India Council SCT** (2022–23). Ran the national training programme
- **Vice-Chair, IEEE Student Branch, NIT Durgapur** (2021–22) · **Vice-President, Debating Society**

SKILLS & TOOLS

Product: product strategy, specs and acceptance criteria, prioritisation (RICE, Kano, MoSCoW), user research, OKRs and metric trees, GTM, teardowns, Figma

Data, analytics & AI: SQL, Python (pandas, NumPy), telemetry and fleet-data analysis, root-cause analysis, A/B testing and sample sizing, metric definition, RAG, LLM APIs, prompt engineering

Engineering & domain: Python, C++, JavaScript, React, Git, APIs, embedded software, model predictive control, Kalman filters, LP optimisation · batteries and BMS, EV, charging, signal processing
